## Projects

### Oddhh

URL : <https://anUSD.github.io>

I have made this website to demonstrate my poems and get feedback on the same. to build this page I have made using the following technology,

Technologies: Html , CSS , Javascript ,Bootstrap.

### Rove [Travel Blog]

URL : <https://anUSD.github.io/pune>

Created a fun travel blog about Pune. Shared my own experiences and tips, along with pictures, to help others explore the city. Made the website easy to use and nice to look at. This showed off my skills in writing and making websites

Technologies: Html , CSS , Javascript ,Bootstrap.

### To-Do App

URL : <https://anUSD.github.io/todo-app/>

A React-based ToDo App is a web tool I have created to manage tasks. It's developed using the React library .The app allows users to create and delete any task.This to-do app is a software application which is build for personal and professional task management, helping individuals and teams stay organized

Technologies: Html , CSS , Javascript ,Bootstrap,React js.
